SKILLS

PROGRAMMING

JavaScript • TypeScript • Python
HTML • CSS • Java

FRAMEWORKS / LIBRARIES

React Native • React • Next.js
NestJS • Redux • Jotai
React Query • TailwindCSS • Expo

TOOLS / PLATFORMS

Git & GitHub • Jira • Sentry
Amplitude • Postman • VS Code
Android Studio • Xcode • Vim

AI EDITORS

Cursor AI • Warp • Claude Code

DATABASES

PostgreSQL • MongoDB • Firebase

ADDITIONAL SKILLS

RESTful APIs • Agile Methodologies
Mobile Profiling • Monorepo Architecture

EDUCATION

SCALER ACADEMY

FULL STACK DEVELOPMENT
2022 -- 2023 | Bengaluru

ICAI

CA CPT | 2015
CA IPCC Group I | 2018
CA IPCC Group II | 2020

PU EDUCATION BOARD

NARAYANA E-TECHNO COLLEGE
XII | 2014 | Bengaluru

KSEEB

RJS SCHOOL
X | 2012 | Bengaluru

CERTIFICATIONS

- Responsive Web Design (freeCodeCamp)
- JavaScript Algorithms & Data Structures
- Mastering React (Mosh Hamedani)
- JavaScript OOP (Mosh Hamedani)

PROFILE SUMMARY

Full-stack mobile engineer with 3+ years of experience across React Native, Next.js, and NestJS. Played a key role in scaling Game Theory's mobile platform to **50k+ downloads** and **20k+ monthly active users**, built mission-critical face-registration and check-in tablet systems, and improved Android performance from **40-50 FPS -> 100-120 FPS**. Known for strong feature ownership, customer-first thinking, and delivering polished end-to-end solutions. Currently expanding system design depth and working toward future team leadership roles.

EXPERIENCE — SOFTWARE ENGINEERING

GAME THEORY | SOFTWARE ENGINEER II

Oct 2023 – Present | Bengaluru

- Helped scale the Game Theory app to **50k+ downloads** and increased MAU from **2k -> 20k+**.
- Boosted Android performance from **40-50 FPS -> 100-120 FPS** via hardware acceleration and render optimizations.
- Built and maintained **React Native tablet apps** for face registration & check-ins, used daily across all venues.
- Delivered features end-to-end: Figma handoff -> brainstorming with design -> development -> testing -> production.
- Worked across Next.js, NestJS, Expo, React Native, TypeScript, Jotai, Redux in a monorepo architecture.
- Improved app stability, resolved performance bottlenecks, and minimized edge-case failures.

MATCHDAY AI | SOFTWARE ENGINEER

Sept 2022 – Sept 2023 | Hyderabad

- Built an internal **React + HTML Canvas tool** for correcting AI-detected shuttle points, improving annotation accuracy.
- Developed React Native apps used by coaches and players for analytics and training insights.
- Contributed to Next.js web applications for internal workflows and product operations.
- Collaborated with ML teams to support human-in-the-loop annotation tooling.

PERSONAL PROJECTS

LASER CUTTING CNC MACHINE 2021 -- PRESENT

- Designed and built a CNC laser cutter for fabric pattern cutting using aluminum rails and custom 3D-printed components.
- Integrated Arduino-driven motor control and precision cutting workflow.

MUSIC PLAYER — REACT.JS SOURCE ON GITHUB

- Built a lightweight music player that streams songs directly from NaaSongs without external API usage.
